#### Description

The panel showing alternative candidates of a selected unit is still somewhat messy.

Please, reformat the panel in the following way (and in the following order):

1. extend phonetic context and add spaces between words
2. duration
3. color the candidates according to a prosodeme type (use the same color as the one used when viewing the source utterances) and remove prosodeme symbol from the panel

Remove other information (target, join, position costs) for now.
