- Status changed from New to Resolved

- % Done changed from 0 to 100

Research done in 2017 regarding electromagnetic articulograph can be divided into two parts. In the first part we conducted experiments with articulation data which we used as new features in unit selection speech synthesis. The second part was dedicated to testing correlation between articulation data and MFCC to find out, whether articulation data can bring a new information.

#### #2 - 07.12.2017 12:25 - Matoušek Jindřich

- Status changed from Resolved to Closed
